

```
#include <stdio.h>
#include <conio.h>
void main()
{
    int i, j, rows;
    printf (" Enter a number to define the rows: \n ");
    scanf("%d", &rows);
    printf("\n");
    for (i = rows; i > 0; i--) // define the outer loop
    {
        for (j = i; j > 0; j--) // define the inner loop
        {
            printf ("* "); // print the Star
        }
        printf ("\n");
    }
    getch();
}
```

Output

```
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
1 2 3 4 5 6
```
